## INTRODUCTION

The history of the customer in the sense of one, who consumes anything, may be said to have started with the history of mankind. The legal, technical or perfect definitions of the consumer have been given in the consumer protection Act, 1986. Under this Act, the term „consumer“ has been defined into two categories:

**(1) Consumer of goods:-** Consumer of goods means a person who buys any goods for a consideration and includes the user of goods. Under this Act a consumer is one who has paid or promised to pay the consideration or partly paid and partly promised to pay or under any deferred payment system such as hire purchase system or installment system. But it does not include a person who buys the goods for resale and for any commercial purpose.

**(2) Consumer of Services:-** Consumer of Services means a person who hires or avails of any services for a consideration which has been paid or promised or partly paid and partly promised or under any system of deferred payment and includes any beneficiary of such services. But it does not include a person who avails of such services for any commercial purposes.

For the purpose of this clause 'commercial purpose' does not include use by a person of goods bought and used by him exclusively for the purpose of earning his livelihood by means of self – employment. For example, if a person earns by purchasing computer, taxi, Photostat machines etc. that will be called consumer of goods. Here it is also important to mention that service has been clearly defined in the Act. It includes the services like banking, financing, insurance,

transportation, processing, supply of electrical and other energy, boarding and lodging or both, housing construction, entertainment, amusement or the purveying of news or other information, educational institutions etc., but does not includes the rendering of any service free of charge or under a contract of personal service.

## CONSUMER EXPLOITATION

Mostly Indian consumer is poor, illiterate, ignorant, passive, unaware, and helpless. Due to illiteracy, unawareness, traditional or passive outlook consumer is being exploited in different ways. The manifestation of consumer neglect are evident in the adulterated food we eat, the spurious, unsafe and substandard product we buy, the repeated shortage of essential commodities accompanied by black marketing and profiteering, the hazardous drugs banned in some of the countries that are pushed through the counter, the glossy, unethical and manipulative advertisements with which we are bombed, the humiliation, indignity and harassment that we are subjected to by public sector undertakings such as railways, transport corporations, nationalized banks insurance companies, etc. and the polluted water we drink and air we breathe.

Business firms spend huge amount of money on advertising their products and services. Most of these advertisements contain exaggerated and unprovable claims. Commonly seen advertisements of tooth-pastes, cosmetics, tonics, body-building, figure improving and height increasing instruments makes claims in very attracted way and catchy way. Through these advertisements do not explain how the claimed qualities of the products produce the benefits, the consumer believes them because of the appealing way of presentation, ultimately the consumer feel cheated at last. Although the above points clearly states the problems exploitation of consumer, but some other points can also be mentioned in support of these. These exploitation are in the forms of:

- (1) Unfair trade practices.
- (2) Spiraling prices.
- (3) Adulteration.
- (4) Poor quality products.
- (5) deceptive packing.
- (6) Deficiency in goods and services
- (7) Monopolistic etc.

## CONSUMER PROTECTION

Consumer Awareness in India is growing. The growing feeling among them that they are ruthlessly exploited and taken for a ride which has organized the consumer movement. Many sellers even do not response to the genuine grievance of consumers and many products fails to

satisfy the requisite quality and safety standards. Due to all these consumer have been more critical/aware of the policies and practices of business houses in the recent years than ever before. Consumers are organizing themselves for the protection of their interests. Such a move to better the protection offered to the consumer is called „consumerism“, which in other word is also called consumers protection awareness. In simple words consumer protection is a form of social action which is created to attain the well being of consumers. In this context it is necessary that the various groups of society such as Government, Judiciary, and Voluntary Associations of consumers play their role to protect and promote the consumer-interests – economic, social, and environmental.

## **CONSUMER PROTECTION METHODS**

Consumer protection measures/methods can be understood by dividing them into two categories:

### **(A) Self-Regulation:-**

In this part, two types of association come to the rescue of customers and business community namely consumer-associations and business associations.

#### **1 Consumer Associations:-**

It is a fact that every one of us is a consumer and it is therefore important that we should unite together to protect our interests. The consumer associations are ideal set up to come together to provide collective resistance against all kinds of associations. The main function of consumer associations are :

- (1) To educate consumers.
- (2) To protect the consumers.

Many consumer associations are playing an important role in the direction of consumer protection. Some of them are : Consumer Welfare Society. (Charkhi Dadri), Consumer Education Society,Bhiwani(Haryana), Etc.

#### **2 Business Associations:**

Another part of self- regulation is Business associations. Self regulations by business community through fair-deal to reseller and consumers does wonders. It can create healthy atmosphere in the society especially in relation to consumer protection

**(B) Government Interventions or legislative measure:**

As we all know that consumers constitutes the largest unorganised public body in the country and protection of their interests and rights is of vital importance in a well regulated and independent mechanism to provide quality goods, services and utilities to the satisfaction of consumer. The government has enacted more than 50 Acts/ laws which can be interpreted in favour of consumers. This enactments have empowered the government to control production, supply, price, distribution and quality of a large no. of goods and services. Most of these types of power or practices are mentioned in a number of business laws aimed at regulating trade and providing justice to consumers and protecting their rights and interests.

Some of them are being mentioned here : The Indian Penal Code 1860, Indian contract Act 1872, Sale of Goods Act 1930, Agricultural produce grading and marking act 1937, Drugs and Cosmetics Act 1940, Drugs and Remedies (objectionable Advertisements) Act, 1954, Essential Commodities Act 1955, Trade and Merchandise Act 1958, Standards and Weights and Measures Act 1976, Supplies of Essential Commodities Act 1980, The Bureau of Indian Standard Act 1986, The Environment (protection) Act-1986, Banking Regulation Act 1949, Railways Act 1989, etc... These are just some names, the list is so long to be mentioned and described here. All these Acts/laws shows that government has a well - established system or a approach for the protection of consumer's interests and for creating an healthy business environment. But at the end, still it can be said that the interests of the consumer were not being safeguarded due to many reasons. A number of objectives of the above pieces of legislations overlap. The multiplicity of laws for trade regulations and consumer protection has been characterised by weak implementation as a result of which unfair and exploitative practices abound in the Indian markets. Most of the legislations are punitive in nature and none of them is compensatory in nature. In spite of all these there was no separate mechanism for the redressal of consumer grievances and it were covered under civil courts, which are known for expensive, time - consuming, complex and inordinate delays.

All these points show that there was a strong need in the economy, to set-up a Independent Act for the settlement of consumer grievances. So in order to overcome these limitations in different legislations and implementing machinery and keeping in view the UN guidelines, Consumer Protection Act 1986, came into existence, which proved to be the milestone in the sovereignty of the customers.

**CONSUMER PROTECTION ACT 1986****INTRODUCTION :-**

The Consumer Protection Act 1986, (herein after to be referred to as 'Act') is one of benevolent social legislation intended to protect the large body of consumer from exploitation. The Act has come as a panacea for consumers all over the country and has assumed the shape of

## CONCLUSIONS AND SUGGESTIONS

Consumer Awareness in India is growing day by day. Consumer Associations, Business Associations and Government Legislations are working to safeguard the interests of the consumers. The consumer protection Act 1986 is the benevolent social legislation intended to protect the large body of consumers from exploitation. It has become vehicle for enabling consumers to secure speedy and inexpensive redressal of their disputes. It clearly specify the concept of goods, services, defect, deficiency etc. It clearly explains the procedure for filing complaint, relief available, appeals etc. It is working as a three tier system (District, State, National) as a quasi-judicial machinery.

The survey clearly shows that all the respondents are having general awareness in relation to consumer protection. They are well-versed with the term 'Jago Grahak Jago' almost in all respect. Quality parameters/standards like ISI, ISO, Agmarks etc. are also not new for them. To overcome this unawareness it is hereby suggested that although huge amount is being spend by the government for creating awareness, but the procedural part is not being shown in the advertisements. Special advertisements should be created to educate the consumers regarding procedure for filing complaint, where to file complaint, when to file complaints etc. News Paper, News Channels should also come forward to educate the consumers on these points. Consumer Association should also come forward to should work more and more to aware the consumers to raise voice against exploitation. Last but not the least; the consumers must educate himself/herself about his rights and availability of redressal mechanisms.
